Easier to put on!

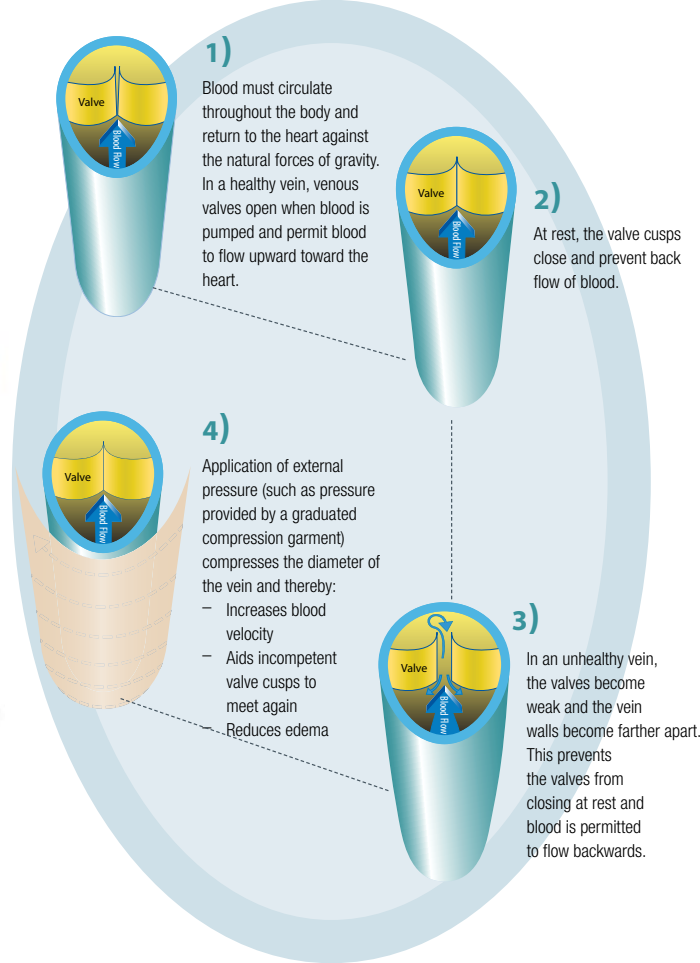

Easier to put on!

Core-Spun Gradient Compression Socks for men and women look and feel like a soft, comfortable everyday sock with the added benefit of medically correct gradient compression. The ultra stretchy yarns make the socks easier to put on and the added thickness makes the socks more comfortable for all-day wear.

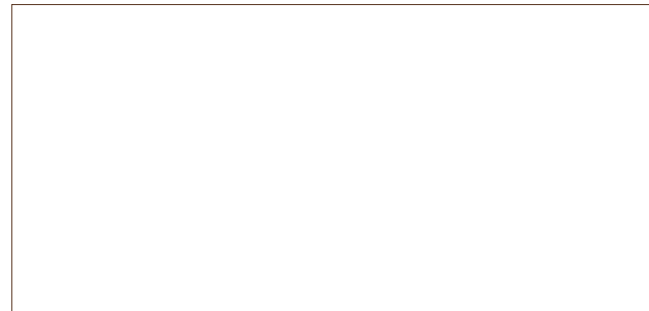

Available in 15-20mmHg, 20-30mmHg and 30-40mmHg.
Patent Pending.

THERAFIRM®

THERAPEUTIC GRADIENT COMPRESSION HOSEY

The Orthotic Group

What does gradient compression hosiery do?

Medical gradient compression stockings improve venous and lymphatic blood flow. **THERAFIRM®** stockings are designed to deliver a controlled amount of pressure which is greatest at the ankle of the garment and gradually decreases towards the top of the stocking. This gradient pressure promotes better venous blood flow which in turn helps to control swelling, varicosities, leg fatigue and other problematic leg conditions.

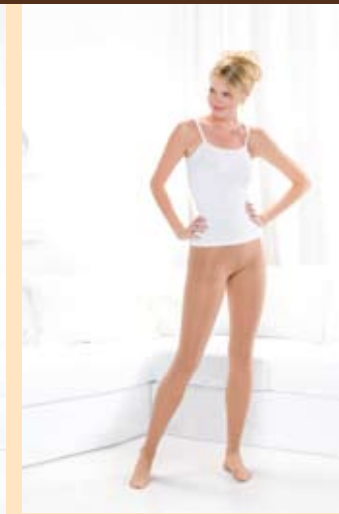

Who should wear gradient compression hosiery?

People who have or are experiencing any of the following conditions can benefit from wearing gradient compression hosiery:

- Tired, aching, fatigued legs
- Swollen feet, ankles, and legs
- People who stand or sit for long periods
- Chronic venous insufficiency
- Moderate to severe varicose veins
- Expectant mothers
- Schlerotherapy
- Lymphedema
- Overweight
- Family history of venous leg disorders

Additionally, many individuals without the preceding conditions simply appreciate wearing our gradient compression hosiery. Most people love the way they make their legs feel. Always consult with your physician before wearing compression stockings.

True Gradient Compression

THERAFIRM® is 100% made in the USA in state of the art manufacturing facilities. Therafirm® gradient compression hosiery meets all applicable standards for quality and medical accuracy. Each lot of product is tested for compression accuracy at each gradient level using the latest standard testing equipment.

Comfortable and Cool

THERAFIRM® products are soft, cool and comfortable for all day wear. Products feature soft, comfort bands on the knee-high stockings and trouser socks, and soft waistbands on pantyhose.

Additionally all **THERAFIRM®** gradient compression hosiery garments are made using our Micro-Cool® process. Micro-Cool® creates a wicking effect so moisture evaporates from the skin quickly, therefore providing a comfortable coolness.

Fashionable

THERAFIRM® uses advanced technologies for developing products that are fashionable and comfortable while delivering the health benefits you need. We offer a wide range of advantages including updated shades, sheer yarns, variety of styles, and knit pattern texture options, so you will feel good about wearing compression hosiery.
